

SECTIONAL GARAGE DOORS

FOUR DIMENSIONS OF QUALITY

01/SAFETY

You can see if a company is safe and trustworthy based on its achievements. From the very beginning of our operation we have striven to immediately respond to market needs. We only cooperate with professional suppliers who take care of their customers. Using state-of-the-art technologies and top quality materials, our company has managed to effectively develop since its start in 1991.

01 S A F E

CUSTOMER SATISFACTION MEANS MEETING ALL CUSTOMER NEEDS FOR US. THAT IS WHY KRISPOL ALWAYS PURSUES

FOUR DIMENSIONS OF QUALITY

03/COMFORT

Quick realization, good communication and top quality service is demanded by the customer. Krispol has distribution networks all over Poland and hundreds of consultants to provide service to the customer. In addition, Krispol offers clients access to complex information through its website at www.krispol.pl.

COMFORT 03

02

TY AESTHETICS

T

02/AESTHETICS

We constantly work at improving our professional image in order to make our products more recognizable.

As a result, for years, KRISPOL has been well-recognized throughout the industry.

LONG-LIFE

04

04/DURABILITY

KRISPOL is a successful company. Our presence in the market is rooted by the thousands of products sold and – more importantly – by our customer's satisfaction. That is how we gain experience, and, as a result, strengthen our position in the Polish and European market. At the same time we are continuously developing our products, which improves our position among leading manufacturers operating in Poland and Europe.

EVERYBODY WANTS TO FEEL SECURE, ESPECIALLY IN THEIR HOMES. OUR CHILDREN SHOULD BE SAFE WHEN PLAYING IN THE GARDEN – OUR HOME SHOULD BE A SAFE HAVEN FOR THE WHOLE FAMILY. KRISPOL GARAGE DOORS GIVE YOU PEACE OF MIND – NOTHING BAD CAN HAPPEN. YOUR CHILDREN, YOUR HOME, YOUR CAR – ARE ALL SAFE NOW.

01 SAFETY*

* SAFETY – THE STATE OF ABSENCE OF DANGER, STATE OF CALM AND CONFIDENCE.

GUARANTEE CONFIRMED

05

The quality of a product is reflected by the requirements it meets. From this point of view, KRISPOL sectional garage doors are top quality products.

Most of all, clients, when buying a garage door, want to be sure that the quality of the product is guaranteed. For this reason KRISPOL doors are manufactured in conformity with the European Normalization Committee guidelines -EN 13241-1.

The CE mark visible on KRISPOL products means conformity with European Union directives applicable to the products. The mark is a confirmation that the product meets user safety and health requirements, and therefore it can be sold in the EU markets.

Garage doors, like all KRISPOL products, have a 24 month guarantee.

SECTIONAL GARAGE DOORS / SAFETY

NO SUPRISES

06

NO SUPRISES

Garage door safety is based on systems eliminating any risk related to every-day use.

All electrically powered doors come equipped with an obstruction sensor which prevents accidents due to crushing. If the door comes in contact with an obstruction (e.g., a ladder or a scooter), it automatically stops and reverses without causing any damage.

Another safety feature is the construction of the sections forming the door blade which eliminate the possibility of accidentally crushing fingers on both sides of the door.

Photocells protect against crushing – the door is lifted automatically when any obstruction is detected at the photocell line level.

Emergency release allows the user to change to manual operation mode in case of a power failure.

CASE CLOSED

07

Adequate protection of a garage door is more than just a mechanism. It is a system composed of many sophisticated elements in every detail.

Electrically operated garage doors are provided with a self-locking device which prevent the lowered garage door from being lifted from the outside, therefore protecting against burglary.

Closing a manually operated door can be done using deadbolt lock, which effectively prevents the closed door from being lifted from the outside.

Another solution used in KRISPOL garage doors is a spring lock operable from both sides and installed from the inside. The lock is recommended in particular for doors installed in garages without an additional entrance.

WE LIKE TO BE SURROUNDED BY BEAUTIFUL THINGS WHICH MATCH.
WE ENJOY THE HARMONY OF COLOURS AND SHAPES.
A KRISPOL GARAGE DOOR CAN BECOME A
BEAUTIFUL PART OF YOUR HOME.

02 AESTHETICS*

* AESTHETICS – THE SCIENCE OF BEAUTY AND RELATED EXPERIENCES
AND OF HUMAN ARTISTIC ACTIVITY.

EMBOSSMENTS, COLOURS, FINISHES

EMBOSSMENTS, COLOURS, FINISHES – A WHOLE PALLETTE OF POSSIBILITIES

09

Looking at a house, it is obvious that a garage door is one of the most important elements of the house – its colour, shape and finish emphasize the character of the building.

It is good to make sure that every detail of your garage door is well chosen. KRISPOL offers you a possibility to harmonize the appearance of your garage door with the building facade.

EMBOSSSED GARAGE DOORS

COLOURS AND FILM FINISHES

KRISPOL sectional garage doors with WOODGRAIN external texture are available in 3 embossment patterns emphasising individual character of the garage door. Basic colours for all embossed garage door types are white and brown.

GOLDEN OAK

WALNUT

MAHOGANY

FILM FINISHES

Garage doors can be finished with one of several film finishes.

RAL COLOURS

The customer may also choose from over ten standard colours, such as:

- pearl white,
- fair ebony,
- ruby red,
- blue,
- azure,
- green,
- several shades of grey,
- ochre,
- several shades of brown,

or order a garage door in any other RAL colour.

PLAIN FLUSH GARAGE DOORS

COLOURS AND FILM FINISHES

KRISPOL sectional garage doors with smooth finish textures are available in flush version and can be divided into two types of finishes: garage doors with RENOLIT plastic film or paint finish.

RENOLIT FILM FINISHES

The RENOLIT palette contains several woodgrain film finishes in different colours.

A wide range of Renolit films offered by KRISPOL allows to match the garage door with both the facade and the windows and entrance door colour.

RAL COLOURS

White is the basic colour for garage doors.
The customer can also choose any other RAL colour.

BEAUTY IS HIDDEN IN DETAILS

Decorative details for flush design garage doors gives the customers a possibility of customizing their garage door. Each detail is made of 1 mm thick, high quality stainless steel.

PATTERNS AND SIZES OF KRISPOL DECORATIVE DETAILS

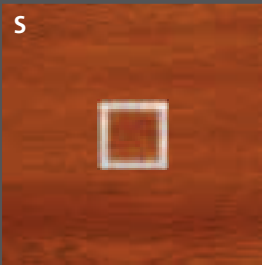

L SIZE DETAILS
→ 300 mm height

M SIZE DETAILS
→ 212 mm height

S SIZE DETAILS
→ 113 mm height

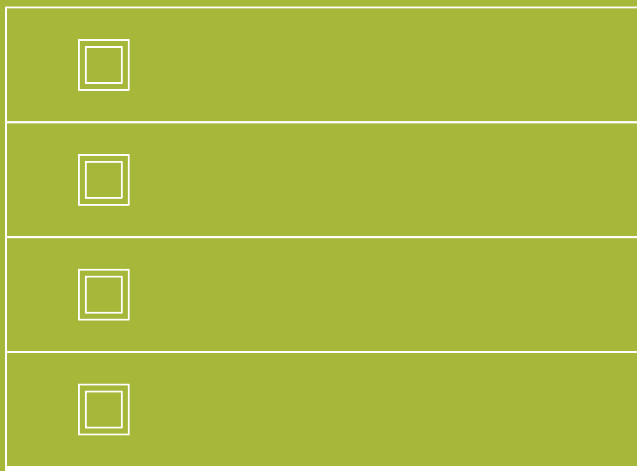

Details can have a:

- mat surface,
- mirror surface,
- surface painted in any RAL colour.

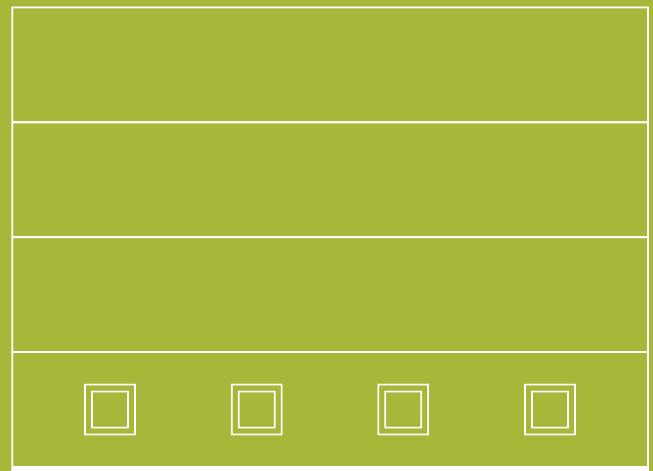

MOUNTING OPTIONS

Decorative details can be mounted in:

→ vertical arrangement
(right or left side)

→ horizontal arrangement
(in the top or bottom section)

MORE LIGHT

The aesthetics and functionality of KRISPOL garage doors may be further enhanced with glazing. A garage door window ensures better lighting of the garage interior. The size and shape of the glazing is matched to the type and appearance of the door (e.g. to the type of door panels) and to the customer’s individual needs.

HANDLES THE FINISHING TOUCH

19

The overall aesthetic appearance is also achieved with quality finishing elements. For all garage doors these include door handles with and without key locks for easy opening. This is one of the last elements the customer should choose when deciding to purchase a garage door. Ideal matching of even such minor details is very important for the overall appearance of the garage door.

COLOUR VARIANTS – HANDLES WITH AND WITHOUT LOCKS

PLACE OF INSTALLATION

In the standard version, handles are installed on the left hand side of the door for easy access for the driver getting out of the car in front of the garage door. The customer can request to have the handle on the right hand side or choose not to have one at all - in the case of automatically operated garage doors.

IT IS GOOD TO BE SURE THAT EVERYTHING IS UNDER CONTROL. SPEED, ACCURACY AND EFFECTIVE ACTIONS GIVE US A SENSE OF COMFORT. MODERN TECHNOLOGY OFFERS US MORE AND MORE SUCH POSSIBILITIES. YOU CAN MAKE UNRESTRICTED USE OF THEM, ESPECIALLY IN YOUR OWN HOME. KRISPOL GARAGE DOORS CAN BE CONTROLLED IN AN EASY AND COMFORTABLE WAY.

03 COMFORT*

* COMFORT – FACILITIES AND EXTERNAL CONDITIONS ENSURING LIFE COMFORTS, COMBINING ABUNDANCE WITH ELEGANCE.

SECTIONAL GARAGE DOORS / COMFORT NO LIMITS

NO LIMITS

21

Each home is different and so are the requirements of its residents, that is why KRISPOL produces custom made products according to individual needs.

KRISPOL sectional garage doors are an ideal solution for non-standard rooms designed for storage of e.g. garden equipment.

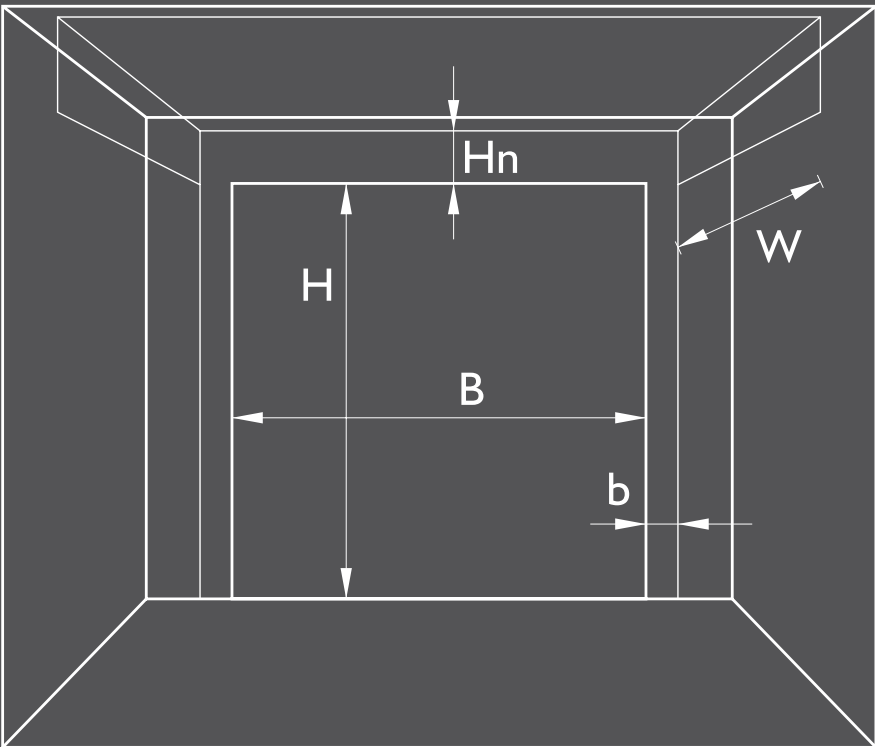

For those looking for budget solutions KRISPOL offers typical garage doors made in the most common dimensions with standard equipment.

IDEAL CUSTOMIZATION

It is essential to accurately coordinate the garage door and the garage dimensions. That is why measurements should be taken in the finished garage. The list of measurements needed to manufacture a garage door includes:

- B- structural opening width
- b – sideroom
- H – structural opening height
- Hn – headroom clearance
- W – installation depth

measuring method
view from garage interior

There is no need for Krispol’s customers to take these measurements on their own – our distributors will offer professional advice on what solutions are best to use and help prepare full garage door specification.

SIMPLY AND COMFORTABLY

23

The decision to buy a garage door requires consultation. KRISPOL distributors are constantly available on the telephone. Professional training they have received guarantees good care of the customer, starting with providing full product information and ending with garage door installation.

When placing an order, KRISPOL customers can be sure that their garage door will be delivered to them adequately packed, in ideal condition and on time.

This is an effect of detailed quality control of both the product itself and the logistic solutions enabling fast and reliable delivery of a garage door to any region.

COMFORTABLE PARKING

The proper design and installation of a garage door ensures comfortable use. Owing to ergonomic solutions offered by KRISPOL, the parking space inside the garage is as large as possible and parking of the car is safe and comfortable.

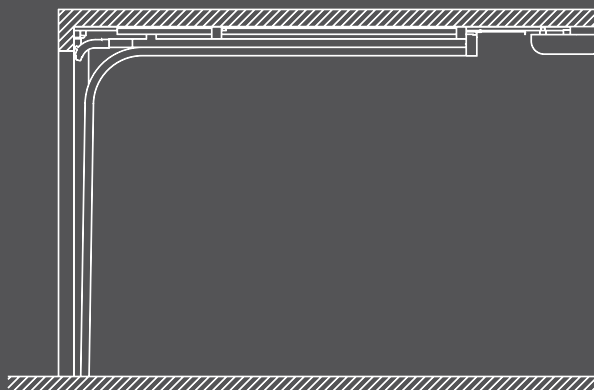

The opening mechanism in KRISPOL garage doors allows for effective use of space both in the garage and in front of it. This is because the garage door is lifted vertically and is positioned right under the ceiling when opened. The four types of guides allow to perfectly match the door to the specific character of the garage.

TYPES OF GUIDES

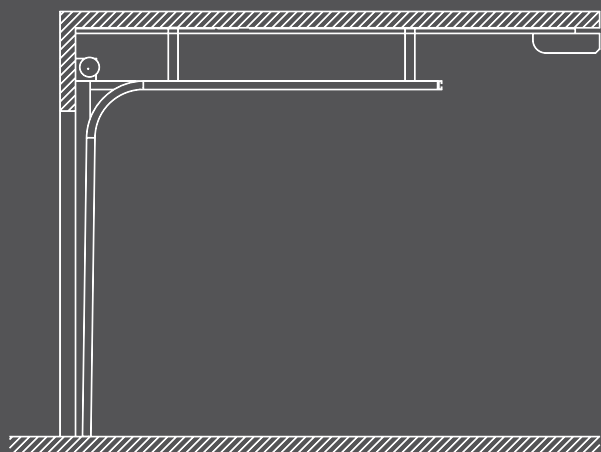

N type guide

popular due to its universal character.

E type guide

with concealed spring-loaded opener.

NH type guide

with maximum use of area under the ceiling.

L type guide

used in garages with very low headroom.

OPEN SESAME

25

KRISPOL offers you electrically powered operators of well-known manufacturers. These are operators mounted centrally under the ceiling in which the power is transmitted by a T rail with a chain or toothed belt. The customer may freely control it with a remote control, with a push button on the code key pad or a key switch.

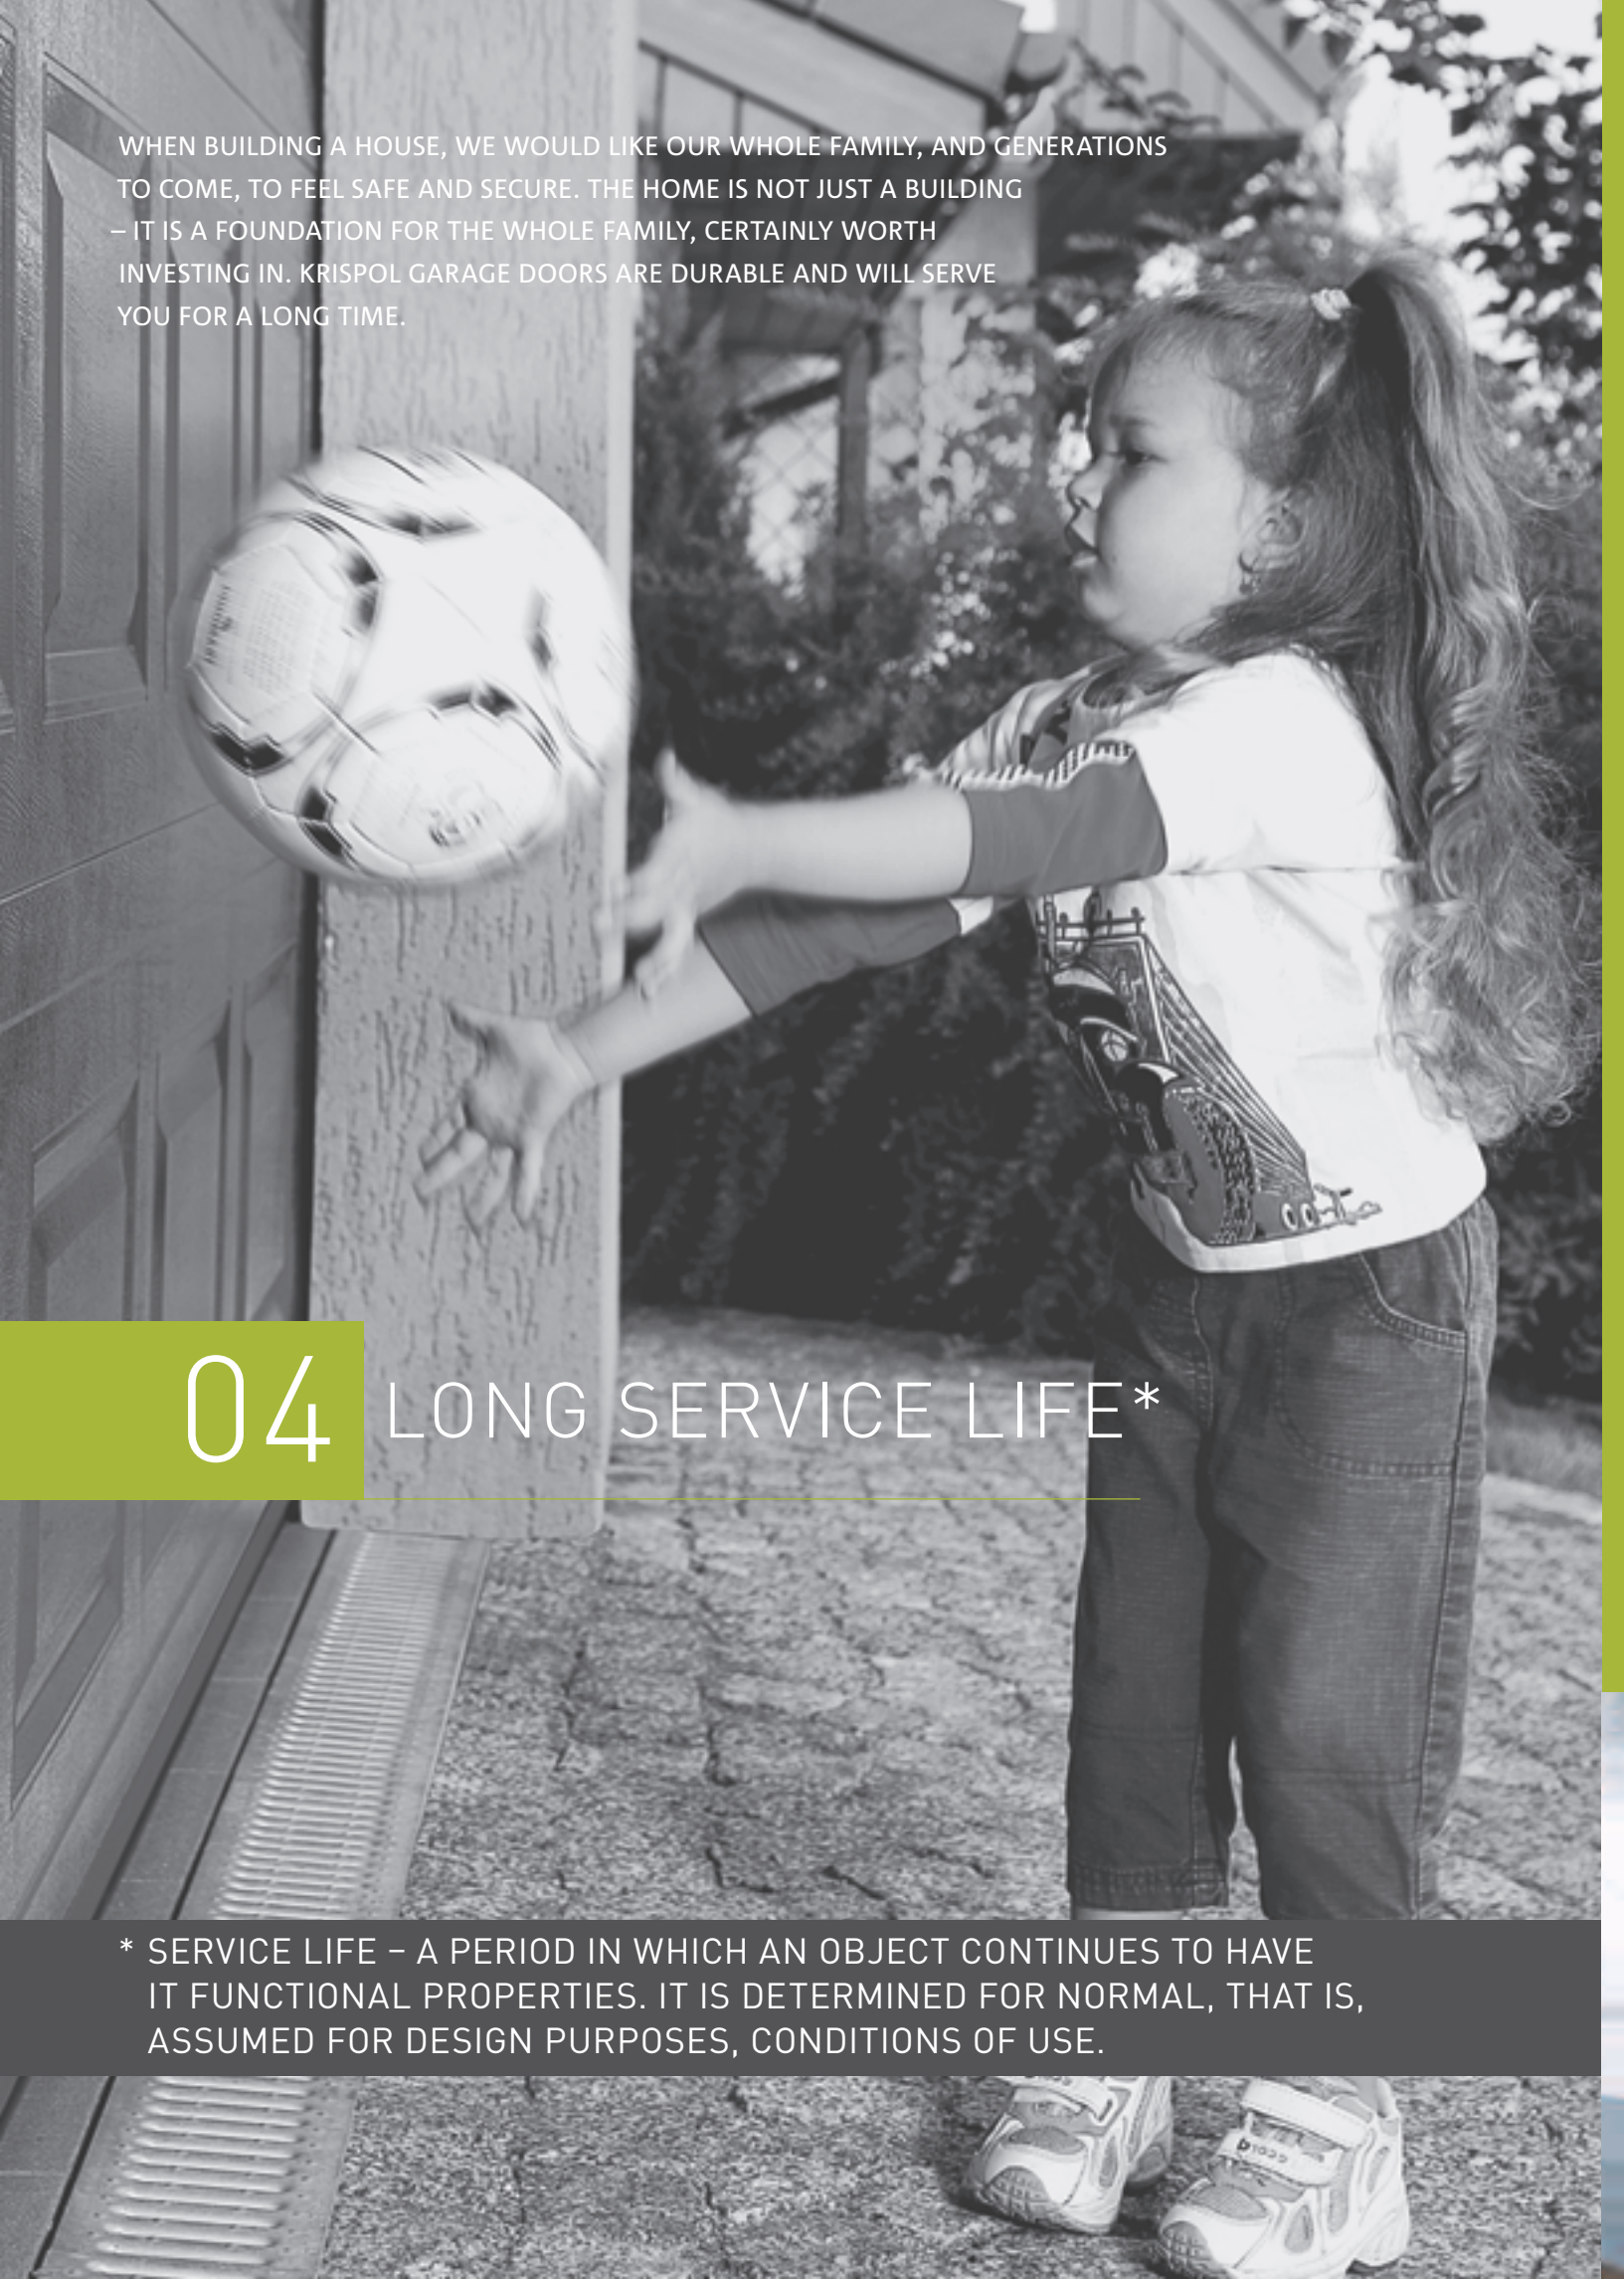

The operators feature a lamp, electronic regulation of limit switches, overload switch, soft start and stop function.

These perfectly sophisticated elements are characterized by modern and aesthetic design, excellent technical parameters, adjustable speed, simple programming and silent operation. All these features guarantee full comfort of garage door operation and compliance with all safety standards.

The customer may use two or four-channel transmitters enabling simultaneous control of many home equipment elements such as the drive gate, garage door and roller shutters.

KRISPOL offers also garage side doors which allow you to enter the garage without opening the garage door. There is also an option to install a wicket door (having the same function) in the garage door. The door can be perfectly matched in terms of colour and appearance to the appearance of the whole garage door.

WHEN BUILDING A HOUSE, WE WOULD LIKE OUR WHOLE FAMILY, AND GENERATIONS TO COME, TO FEEL SAFE AND SECURE. THE HOME IS NOT JUST A BUILDING – IT IS A FOUNDATION FOR THE WHOLE FAMILY, CERTAINLY WORTH INVESTING IN. KRISPOL GARAGE DOORS ARE DURABLE AND WILL SERVE YOU FOR A LONG TIME.

04 LONG SERVICE LIFE*

* SERVICE LIFE – A PERIOD IN WHICH AN OBJECT CONTINUES TO HAVE IT FUNCTIONAL PROPERTIES. IT IS DETERMINED FOR NORMAL, THAT IS, ASSUMED FOR DESIGN PURPOSES, CONDITIONS OF USE.

FIRST OF ALL – MATERIALS

27

To be durable the garage door must be made of durable materials - that is obvious. That's why KRISPOL sectional garage door sections are made of polyester coated hot dip-galvanized steel metal sheet.

The sections are filled with CFC-free polyurethane foam which provides heat and acoustic insulation. Their heat insulation value is within the range 1.1–1.5 W/m²K depending on the type of panels and glazing used.

KRISPOL garage doors are sophisticated in every detail and their top quality finishing has a direct effect on their durability, for example, the rubber weatherstripping along the garage door perimeter and seals between the door sections protecting the garage interior against humidity and noise.

SECTIONAL GARAGE DOORS / DURABILITY QUALITY CONTROL AT EVERY STAGE

28

QUALITY CONTROL AT EVERY STAGE

The materials used for garage door manufacturing meet all EU quality requirements and the quality control system implemented by KRISPOL covers all production stages.

At each stage of production, highly skilled workers are obligated to check that the quality of the material meets all requirements.

Because of this control system, all Krispol garage doors are durable and sophisticated in every detail.

SECTIONAL GARAGE DOORS USER OPINIONS

30

USER OPINION

Customer satisfaction is the most important thing to us, especially if the customer is demanding. We are pleased the number of satisfied users of our garage doors is growing. Thank you for choosing KRISPOL.

"I was not satisfied with the garage door I had had for years. It was fairly worn, leaking and hard to open. I decided to install a new one. I chose KRISPOL and it was a good choice. I don't have any more problems."

"KRISPOL garage doors are of the highest quality. I can recommend them to anybody who is looking for comfort and safety."

"I had a Krispol garage door installed a few years ago and I have never had any problems with it. It is a product that I can recommend to others."

"A window installer recommended a KRISPOL garage door. The reason for it was that it would match perfectly with the windows and the whole facade. My house looks excellent."

"I don't know much about technical matters, so prior to installing the garage door, I wanted to consult an expert. My son found the KRISPOL web site in the Internet and made an appointment with a consultant. After meeting with the consultant, I decided to buy a KRISPOL garage door and I am satisfied."

"I saw an advertisement with a promotional offer for Krispol garage

doors. There were two deciding factors - price and appearance – for my decision to buy it: the price and the looks. I chose the Golden Oak finish and it was a good decision.”

“When buying anything I always look at the brand. I prefer to pay slightly more but be sure it was a good choice. I follow this principle especially when making bigger purchases. That is why when buying a garage door I chose KRISPOL, especially that I already have KRISPOL roller shutters.”

“My wife is an interior decorator and I trust her taste. I tend to look at purchases from a functional and financial point of view. KRISPOL fulfilled both of our expectations.”
